secondViewController

//声明block
typealias sendValueToLast = (_ string:String)–>Void

```swift
class secondViewController: UIViewController {

    //创建一个闭包属性
    var sendValueBlock : sendValueToLast?
    func sendValueBlock(block: @escaping (_ string:String)–>Void) {
        sendValueBlock = block;
    }
}
```

//创建一个闭包属性
   var sendValueBlock : sendValueToLast?
   func sendValueBlock(block: @escaping (_ string:String)–>Void) {
       sendValueBlock = block;
   }

调用block

```swift
    if (self.sendValueBlock != nil)
    {
        self.sendValueBlock!("")
    }
```

if (self.sendValueBlock != nil)
    {

```
        self.sendValueBlock!("")
    }
```

ViewController

```
let secondVc = secondViewController();

secondVc.sendValueBlock { (tempString) in
    print("tempString \(tempString)");
}
```

```
let secondVc = secondViewController();

    secondVc.sendValueBlock { (tempString) in
        print("tempString \(tempString)");
    }
```
